

## CHARGING CART

## 32 CHROMEBOOK/LAPTOP/TABLET SMART CHARGING CART

### LLTS32-B

Introducing the LLTS32-B, Luxor's intelligent charging cart for mobile computing devices featuring full UL-60950-1 safety certification. Ideal for transporting, securing, and charging up to 32 Chromebooks, laptops, or tablets, this next generation cart is essential for integrating technology into today's classroom or business.

The LLTS32-B's built-in smart charging system monitors all 32 devices and will determine the best charging sequence by detecting and identifying the current power status, and switching the charging mode automatically between full charge or cycle charge to optimize charging time and ensure all devices are charging safely. It is automatic, safe, and offers intelligent charging at an affordable price point.

### FEATURES

- Full certification to the UL-60950-1 safety standard
- cUL approved
- Meets ANSI/BIFMA standards
- Charges up to 32 Chromebooks, Laptops, or Tablets (16 per shelf up to 15.6" screen)
